AP200 pH/ORP sensors

Introduction

This document provides an overview of the AP200 series sensor life-cycle phases detailing ABB's availability to support this product now and in the foreseeable future. The pH/ORP sensors are defined in the chart below:

Part number	Description
AP201/	Insertion-style, pH/ORP sensors
AP202/	Flow-through, pH/ORP sensors
AP203/	Immersion/dip-style, pH/ORP sensors

Product life-cycle

AP200 pH/ORP sensors

ABB's range of [Water Analyzers](#) are designed for continuous evolution, and each of the individual products go through a defined life-cycle process.

Once the product has been removed from Active sale we will continue to support the product with spares for up to 7 years through the Classic and Limited life-cycle phase.

Where possible we will endeavor to secure stock at the point of when the product has been removed from Active sale to support the installed base. However, it is important to note that during this period certain spares may no longer be able to be sourced due to component obsolescence issues outside of ABB control.

AP200 service offerings through the product life-cycle

	Life-cycle management phase			
	Active	Classic	Limited	Obsolete
